Some Men of Zeal condemn all *Uſury*,
But that we think too great Severity;
Without it *Trade* would languiſh, and the Poor
Be more neceſſitated than before.
Exceſs makes Vice; — on Intereſt you may lend,
But barr *Extortion* whilſt you ſeem a Friend.
And you that *borrow*, mind to keep your Day,
Elſe you not only *Uſe* but *Coſt* muſt pay.

King William and Queen Mary Crown'd April 11. 1689.—

Began or Proclaim'd Feb. 13. 1685.

Great are the Monarchs of our *English* Throne,
What Kingdom can a Race so glorious own?
Lo here's a Catalogue of Royal Race;
In none you can more marks of Valour trace,
Nor find a *Prince* amongst them all, possess
A greater Share of nobler Happiness
Than he, in greatest Dangers takes our Parts,
And thereby makes true Subjects, Loyal Hearts.
May *William* ever Great and Glorious be,
And daily blest with Fame and Victory.

Notes and Observations upon the true and natural System *of the World.* In the *Ptolomaick Hypotheſis* there are Diſeaſes, and in the *Copernican* their Cures. All the Sects of Philoſophers account it a great Inconvenience, that a Body naturally moveable in *Cyrcomgyration* ſhould move irregularly upon its own Center, and regularly upon another point;

Astrological Conjectures or Observations.

A superioribus inferiora reguntur. Many are the Configurations of this Month, it comes in with a glorious *Trine* of the *Sun* and *Jove*, who also meets with the same benevolent Aspect of *Venus*, here is some eminent Person either Lawyer or Divine near Preferment, and some notable things under debate, for the Heavens seem to represent the Actions of Mankind in a hopefull way of Reconciliation. As for private Disgusts and Animosities, let the Persons concerned compose at pleasure. Great Application to Men in power, yet busie active Spirits create themselves trouble. And at this Juncture great things depending are manag'd with much Secrecy.

Eng. Accounts

dies contrary motions from *East* to *West*, and at the same time form *West* to *East*: But in the *Copernican*, all the Revolutions of the Cœlestials are one way, *viz.* from *West* to *East*, besides the Stations and Retrogradations of the *Planets* are taken away by one single motion of the Earth, otherwise, with *Ptolomy* you must introduce very great *Epicicles*

so long as we have regard only to Terrestrial things; but yet it is on the contrary as necessary, that the same Motion do seem common to all other bodies, that being separated from the Earth, participate not of the same. 'tis no *Illogical* Assertion to say, that the *Sun* as the grand Minister of Nature, and in a sense the Heart of the World, infuseth into the other Bodies that environ it, not only *Light* but *Motion* also by revolving in it self (upon its own *Axis*) so that in the same manner that the motion of the Heart of an *Animal* ceasing, all the other motion of its Members would cease.

Astrological Conjectures or Observations, &c.

Veritas in profundo latet.

We may expect now about this time many weighty and extraordinary Consultations in our Nation, tending to the regulation of old customs and priviledges, and the People in general are active and their spirits up, being in great expectation to see better days, and in other Countries adjacent to ours the People are as active as we can be, amongst the rest 'tis to be feared the Affairs of *Poland* are not yet compleatly settled; but of a right understanding at home, in our own Nation there is as much hopes now as ever, and certainly good Intelligence arrives, and most of it pleasing to the *LONDON* Merchants, for the Month concludes with a hopeful Trine of the *Sun* and *Jupiter*.

So the convertion of the Sun ceasing, the convertion of the Planets would stand still, for his Light gathereth & Converts all things to himself, &c. *Ptolemy*'s follow themselves are not satisfied with his *System*, and they conclude fom ther must be found out, which is more true and Consentaneous to the tion of the Heavens; for though the *Phanomena* of Cœlestial Bo may seem to be generally resolv'd by

Fiat Justitia, vivat Rex!

The Affairs of our Nation appear in a very hopeful posture, for now we may discover that Ballome has been lately applyed to our Wounds to good purpose, and we remain more quiet than many desire. Here falls a Quartile of *Saturn* and *Mars* this Month, and *Mars* and *Mercury* are configurated with *Jupiter*, which shews there is still remaining a Snake in the Grass, and there are those that labour secretly to disturb the Nation, by endeavouring to corrupt and poyson the minds of the People; But I wish all secret Plots or damnable designs against His Sacred Majesty or the Government were transported, with the Agents thereof to *Utopia*: so that *England* may be secure, and the Subjects thereof live in Amity together.

and that conceit of the Heaven which is void of Stars, called the *Primum Mobile*, moving the inferious Heavens or Orbs, than which no hing can be more weakly grounded, and more easily controverted and disputed. Now whatever in holy Writ seems to dissent from this Doctrine of the Earths motion, it ought absolutely to be receiv'd and understood, *secundum vulgi sententiam*, &c.

Astrological Conjectures or Observations.

Est quædam dolendi voluptas

The Configurations of this Month being generally Benevolent, I may rationally hope their Influence may produce Peace and Union in the ſpirits of Male contented perſons; and every prudent Man will be ſo wiſe as to keep within bounds. Let us patiently wait for the happy effects of ſome late material councils, and let us not repine at thoſe things which cannot be amended, the Trine of the *Sun* and *Saturn* with the Conjunction of the Fortunes towards the end hereof may produce very hopeful News to ſome particular perſons, and the advantage of the whole Nation in general. Now we may expect to hear of new Leagues Agitated, or old ones farther confirm'd, alſo a ſtrong inclination of all *European* Princes for a firm Settlement and continuation of a happy Peace and Union.

Et communem Loquendi & concipiendi stylum. For the holy re-
cords speak according to our manner of understanding, a-
according to that which appeareth in respect of us: Fo
thus it is with those Bodies in comparison of us, and as the
are described by the vulgar and common way of humane di
course, so that the Earth appears as if it were standing still and immovable

Quot homines tot ſententiæ.

Now we may plainly ſee that the more prudent ſort of Men in our Nation, are active in the reforming of diſorders, and the promoting of the Laws and Religion; But ſtill we may expect that the Rabble and Giddy headed Multitude will be too apt to run themſelves into confuſion. There are yet many weighty and ſerious Conſultations on foot, and there are now many honeſt and judicious perſons imployed in matters of great moment in relation to the felicity of our own Nation to good purpoſe. 'Tis now we are able to diſcover that all ſtreams of miſchief have flowed from a corrupted Fountain, and let ſuch perſons that will engage themſelves into Traiterous and Rebellious Actions, either out of the heat of Zeal or Intereſt, periſh, *&c.*

December

receiv'd by Philosophers, as for instance, That nature does not multiply things without necessity, and that she makes use of the most facile and simple means in producing her effects, and that she doth nothing in vain, &c. Ergo the Facility and simplicity of this new *Constitution* or *Hypothesis*, should rather be accepted, than the multiplicity, confusion, and difficulty that is in the old *Hypothesis*.

If By this Table you would have the Moon's Southing for every day, 'tis but adding the half difference between any two of these Southings that lie together to the lesser Southing. So the half difference between the first and third of *March* is here 53m. which added to 11 h. 12′ (the ☽'s Southing the first day) gives 12h. 5′ the ☽'s Southing that day, that is, 5m. after on the 2d day, *& sic de cæteris*

Neceſſary Præcognita.

1. THE *Aſtrologer* conſidereth future Events (or Effects) a they are fore-ſignified in their known Cauſes; an knowledge of future Things, without their Cauſes, abſolutel belong to God only, and to whom he is pleaſed to reveal them as to his Prophets, *&c.* But in their Cauſes Men may attai to that Knowledge, as *Aſtrologers*, *Phyſicians*, *Husbandmen*, &c ſuch Perſons can diſcern events in their Determinate Cauſes Nor do *Aſtrologers* intrude into the ſecret Judgments whic God Almighty hath reſerved to himſelf: For certain it i that he that ſeeketh God in his Glory, ſhall be oppreſſed i his Majeſty: There is nothing paſt or to come with him; bu all things are preſent with him, as they depend upon his fore Ordinance and Preſcience of all things in the World out of thei Cauſes: and it hath pleaſed him to govern the ordinary cour of Nature by his Second Cauſes, and in them to reveal wha he hath from Eternity, appointed to effect by them. To kno this, is not to enter into his ſecret Judgment, but more effe ctually contemplate the Incomprehenſible Providence of th Almighty, that has thus coupled the order of Cauſes, with hi own moſt free and Omnipotent Will.

For the attaining of which knowledge of future Event as near as may be rationally conjectured (not poſitive affirm

firmed or Predicted) God Almighty has endued Man with a reasonable Soul, and Divine Understanding, that he might distinguish him by this Participation, of his own Divinity (as it were) in some measure from the brute Creatures, which have little or no sense of things past or to come: Whereas Men by the Discourse of Reason, and help of Art, and Experience, both retain the Memory of that which is come to pass long since; and do further make those things present unto them, which to the ignorant seem yet to come; and which kind of fore-knowledge of things in their Causes, are proper to Men and other intellectual Natures; and therefore to be exempted from the Title of *Divination*, *Conjuring*, and such like Reflective Expressions.

'Tis not hard to conceive that our minds are affected by our Humours, and this all rational Persons will grant, except they will obstinately make Wars against (the ablest) *Physicians*, and against their own Senses. Wherefore I presume that they will grant that *Choler* provoketh some to *Anger*, that *Melancholy* inclines others to *Treachery* and *Perfidiousness*; that *Phlegm* maketh Men *Lazy* and *Dull*: What is it then that is reputed so Impious, and we are so much afraid to confess? *viz.* That *Mars* increases *Choler*, *Saturn Melancholy*, the *Moon Phlegm*. Then after these *Criticks* have granted, that our Affections and Manners are changed by our Humours, [which is but a reasonable *Postulata*,] it were more material to say, that *Choler* is made and increased by the Influence of *Mars*, rather than by that common hot Spice, *Pepper*; or the *hot Constitution* of the Air, or of the *Season*; if they acknowledge that *Spice*, and other hot Simples, are of force to stir up and alter our Humors. And thus the reason of the Stars, or Laws of the *Stars*, and their *Cœlestial Effects*, *viz.* *Astronomy* and *Astrology*, is Lawful to be Studied and Practised, so far as 'tis guided by Reason, and submits to the Power and Divine Providence of God Almighty, who is *Natura Naturans*. There are in the World indeed many new *Philosophical Romances*, and we know one Man's Meat is another Man's Poyson: But I would not have any pretended *Monarchy*, or *Monopoly* of Knowledge oppose that which is real Truth; or indeed that any Man should be so impudent, as to attempt to draw a Circle about the Imagination of his weak Brother, to Conjure him to believe a subtle Falsity, for a direct and positive Truth.

(II.) *Astrological* Judgments and Observations upon the Quarterly Ingresses of the Sun this Year, 1698. And first of the Sun in *Capricorn*, 1697. *December* the 10th 11h. 26m. P.M. the *Winter Quarter*; in which *Scheme* I find the Quadrat of the *Sun* and *Mars*, as also *Sextile* of *Mars* and *Venus*; the *Moon* defluxes from a *Trine* of *Jupiter* and *Square* of *Mercury*, and applies to the *Square* of the *Sun* and *Opposition* of *Mars*; and Lastly to the *Trine* of *Venus*, &c.

In the *Figure* there is 22 deg. of *Gemini Culminates*, and about 24 d. of *Virgo* ascending, *Saturn* in *Aquary* in the 6th, *Jupiter* in *Scorpio* in the Third House, *Mars* is now entring *Libra*, and *Venus* and *Mercury* in *Sagittary*; also the *Moon* just entring the Sign *Aries*. And thus stands the Position, to which add the *Moon* is Setting, and all the *Planets* under the Earth; whence I shall deduce this brief Judgment; That this is like to be a peaceable quiet Quarter in general (if we can but agree among our selves) for *Mars* is entring into the Sign of Justice, and there will continue (Direct and Retrograde) for many Months, *viz.* at least half the Year, which is very remarkable; This shews a strong Inclination, in all or most Persons of Note to a Retirement, and to cease (at least) from any further Hostile Actions during this Quarter (and I hope for some future Years) and rather endeavour to settle and fix things again in their right order throughout *Europe*, [that have so long been in Confusion and Misery] than any longer to aggravate the same. Peace is now welcome to all Persons in general, but such as cannot live without a continuance of War, or some worse Exercise; 'Tis the desires, I say, of some principal Persons, Members both of *Church* and *State*, that a settled Peace should be established; and their earnest Addresses have not been wanting to *Kings*, *Princes*, and other Governours and Rulers of Nations, for Peace and Reconciliation of all former Breaches, and tedious Calamities, that both Rich and Poor have been afflicted with, for at least seven Years last past. There will be notwithstanding many Disgusts and Bickering between Man and Man, but felicity in general approaches; and let us all pray for Blessings upon the happy Peacemakers.

(III.) Of the *Spring Quarter*, or the *Suns* Ingress into *Aries*, which this Year commences (according to the new Tables of my Friend Mr. *John Wing*, not yet extant) *March* the 9th, at 14h. 23m. after Noon, at which time about 8 deg. of Scorpio Culminates,

minates, and 2 deg. of *Capricorn* ascends, the Moon separates from a Square of *Mars*, and applies to the *Trine* of *Venus* and ☍; in this Figure the *Sun* is in *Trine* to *Jove*, and he in △ *Venus*, which is a position very calm and favourable in general; but the ☉ and ♀ are shortly after opposed by ♂.

From this *Figure* of the *Sun's Ingress*, much good may be expected to succeed; It shews great Union between the People and their Superiours; and that some good Reformation is now or very near at hand; *Mars* is still in the *Cœlestial Ballance*, Retrograde in the 9th, which may foment Disputes in Religious Matters, and render some Persons very uneasie; thô the Heavens themselves portend nothing but *Tranquility* in general Terms. Now we may be happy if we will be so; God direct the Hearts of those that sit at the Stern of Government, and give us patient and willing Minds to Obedience. The *Moon* is very potent and angular in the *Scheme*, &c. Now the People do plainly see their former Errours and Mistakes, and discover also the Falacies and damnable Designs of those ill minded Agents, that like *Wolves* in *Sheeps* Cloathing, have too long lurked covertly amongst us; and I hope we shall not shun *Charibdis* to fall into *Scylla*; many Persons formerly in good Esteem, and very splendid, must expect to be rejected and cast out of Favour; let them thank themselves; but according to the Constitution of the Scheme, matters in general should succeed well amongst us; we are now in hopes of a happy Settlement, also good Trade and Commerce may now be expected; for doubtless great are the Consultations, Counsels and Debates of those worthy Heroes that sit at the Helm, as well abroad as at home, to compose Matters that at present remain in great disorder. But the Face of Affairs in general, at this juncture, should be in much better order than many expected

IV. Of the *Summer Quarter*, which this Year Commences June 11th, at 3h. 18' *manè*, at which time we have about 19 of ♎ upon the M C, and 23d of ♊ Ascending; the ☽ separates from the □ of ♄, and applies to the ✶ of *Mars*, the full ☽ postventional falls in about 2 deg. of ♈, and at the beginning of this Quarter, we have then a Benevolent △ of the Fortunes, and the ♂ of the ☉ and ☿, The 25 hereof we have a □ of the ☉ and ♂, and the 29 a △ of the ☉ and ♃ *Mars* continues still in the *Cœlestial Ballance*, and now runs swiftly through that Sign. And certainly the Actions of these times, do more than seem to relate to a perfect Settlement and

Accommodation of all former Controversies; for the Configurations now in force, do manifest much Harmony and Concord, Unity and Peace in all or most Nations of *Europe*, such Positions usually declare the motion of *Embassadors*, or such like Agents, imployed by Kings and Princes, for the Establishment of *Leagues* of *Friendship* and *Amity* one amongst another: and the aforesaid △ of ♆ and ☿, seems to portend some *Great Marriage*, in or near the Northern parts of *Europe*, and abundance of Union and Friendship obtained thereby: This is not all, for here is Preferment, or considerable Advancement attends some well deserving Persons, also of no mean Quality amongst us. And I have good Grounds to Conjecture (whatever may be reported to the contrary) that yet more firm Leagues are Contracting (though perhaps with some difficulty) than in former times; and at the same time there are a sort of dissatisfied People in our own Nation, dissenting in Judgment, or not well affected to the Government, will remain much dissatisfied and uneasie, as will appear by their scribling Pamphlets, and private Mutterings and Repinings. But in the main, the whole Face of Heaven, at this Ingress, promises *Tranquility* unto our own Nation, and several others adjacent. And now there is a probability we may not have so much Sickness this Summer, as to violent and pestilential Fevers, as some other Years have produced: And thus I conclude this *Summer Quarter*, with this piece of plain Rhyme:

In all our Actions let's care so to live,
That no occasion of offence we give
To any Man with either Pen or Tongue,
In Name, or Fame, or Goods to do him wrong:
For he's the greatest Murtherer alive,
That doth a Man of his good Name deprive
With base Calumnious Slanders and false Lies,
'Tis the worst Villany of Villanies. Verbum Sat.

Of the *Autumnal*, or *Harvest Quarter*, which this Year begins *Sept.* 12th, at 3h. 57 P. m, at which time we have the beginning of ♎ upon the Mid-heaven, and about 29 degr. of ♈ ascending. The full Moon preventional, was from about 27 degr. of ♏. and ♓. and in the Scheme of the Ingress the ☽ separates from the ☍ of ♅ and hastens to the opposition

of ♈, and ☿, who about the 15th day meets the □ of ♄, Mars has now quickly passed through the Sign ♏ and just entring the Sign *Sagittary*, and afterwards meets with the Friendly ✶ of the *Sun* and *Saturn*, besides many other benevolent Configurations amongst the other Planets. These are good Arguments that matters go very well amongst us, and People do now begin to take Courage, and have good Hopes of better times, than we have had these half score Years last past. God direct Mens Minds to require Justice, and their Superiors to incline thereto. For still I find mens Minds are various, Humane Actions many, and those of different Natures. Now we may hope well, and expect deliberate Councils, and no less solid Conclusions in agitation; and yet the Minds of the vulgar sorts of Men, have been troubled and discontented; and they seem much inclined to Repine against the Edicts of their Superiours and Governours. But the Merchants may expect for the most part hopeful Returns, notwithstanding all seeming danger, by Winds or Tempests, which I conceive may not be very violent near our Coast this Month. Also the Counsels of Princes, according to the genuine and natural Significations and Influences of the Heavenly Bodies, do now all over *Europe* rather incline to peace and Unity, than fresh Breaches or new Disputes to arise amongst them, more particularly *England*, *France*, *Spain*, *Germany*, *Sweden*, *Polonia*, *Denmark*, &c. And to sum up all in few words, we find more of Consultation and Regulation than Action, during the whole Year. And I have great hopes, that the great Affairs of our Nation now depending, will shortly be brought to some happy Conclusion or Determination: For there are certain bounds set by Providence, beyond which the most Ambitious Prince cannot go.

VIII. *The Explanation and Use of the precedent Tables of the Fixed Stars.*

THE Table of *Pleiades*, or *Seven Stars*, contain ten Columns, the first towards the left hand, expresses every fifth day of each Month, as 1,6,11,16,21,26. The second shews their Rising in Hours and Minutes: The third their Southing: The fourth their Setting; as is plain by their very Titles: And observe, That the letter (a) denotes after Noon, and (b) before Noon; and so in the fifth, sixth, and seventh Column the same, as also the eighth, ninth, and tenth, is continued the Rising, Southing, and Setting of the *Pleiades*, for every fifth day throughout the Year, as it plain and intelligible to the meanest Capacity. As for Example: *Viz.*

Suppose I desire to know the Rising, Southing, and Setting of the *Seven Stars*, *January* the 21st. I find by the Table they Rise 16′ after 10 before Noon, South 32′ past 6 after Noon, and Set 48′ past 2 in the Morning. And so against the 6th of *August* they rise 29′ past 9 after Noon, or at Night, they South 45′ past 5 in the Morning, (as the Letter m denotes) and they set 1′ past 2 after Noon, *Et sic in aliis.* In the second Table of *Fixed Stars*, there are seven Columns. (1.) The Names of the Stars. (2.) Their Rising. (3.) Their Southing. (4.) Their Setting, either before or after the *Pleiades*. (5.) Their Latitude. (6.) Their Magnitude. (7.) Their Natures; as the Titles direct. In the Colums of Rising, Southing, and Setting, is now expres'd how many Hours they Rise, South, and Set, either before or after the *Seven Stars*, as the Letters (a) and (b) denotes. *Example:* The *Pleiades* South the 21 of *January* 32′ past 6 at Night; and in the second Table, I find that *Syrius*, or the great Dog-Star, Souths 3h. 3′ after; which added to 6h. 32′, the Sum is 9h. 35′, or 35′ past 9 at Night; at which time *Syrius* is upon the *Meridian* with 39d. 30′ of South Latitude: He is a *Star* of the first *Magnitude*, and said to be of the Nature of *Jupiter* and *Mars*. The same is to be understood of all the rest: *Usus promptus facit.*

There will be only two *Eclipses* of the *Sun* this Year, and none of the *Moon*, but neither of these visible in our *Horizon* or *Hemisphere*. The first falls the 31st of *March*, about 7 at Night, in 21 degrees of *Aries*, not visible. The Second will be *September* 24th, at 4 in the Morning, and therefore Invisible to us. It falls in 11 degr. of *Libra*, the other *Equinoctial* Sign; and *Ptolomy* says, *Nihil nocent Eclipses in istis Regionibus in quibus*

videntur, i. e. *Eclipses* hurt nothing at all in those ... wherein they are not visible; but others by Expe... have found the contrary; and say, that *Eclipses*, whether *Terrantan*, or *Supra Terrantan*, shall operate more or less; ... violently and conspicuously if it be seen and above the ... but more obscurely if it be not visible; but in such pla... subject to the Sign and Quarter of Heaven afflicted. Such ... usually shew the Death of Great Persons, *viz. Kings* ... *Princes* the ensuing Year; and it menaces those of the Fe... Sex also.

IX. *Some other general Remarks upon the Year* 1698, 1699, *and* 1700. *of which last Year I intimated something from Mr.* Lilly, *that he writ many Years since*, &c.

John Holwell, [who was almost 30 Years since my Scholar] in his *Catastrophe Mundi*, Collected from Mr. *Lilly* and o... as also the Consideration of the *Hieroglyphicks*, by him ... Published, *&c.* says, upon the Year 1698. It is like ... a Year of much Action, in regard *Saturn* Transites the ... *Conjunction* in 1682. by an *Opposition*, and *Jupiter* by a *Quartile*. It threatens *Italy* with no less than Confusion, and ... Subversion of the Triple Crown; although it may not ... fully compleated this Year, yet a great Essay will now be ... towards it: The Sea shall swell with great Navies of ... and there shall be great *Sea Fights*. *England* (saith he) ... shalt have a hand in it, and thou shalt be victorious. *France*, its Power is brought low, and the late War has destroy... Thousands of his Subjects; few or none of them but have ... to purpose, through the Pride of an Insulting King, ... the Envy of the *Roman* Clergy. The Year 1699. he says ... also produce great Actions; and now those Villanies that have ... for many Years kept secret, will be openly published to ... one. All Nations will be troubled with Rumors of Wars, ... every Religion busie in preparing of Armies for Defence. Now, says he, *Holland* look to thy self. Terrible Sea Fights ... be this Year, with abundance of strange Disasters to man... if he be in the right: and at last a great Man appears, ... potent Conquerour, whose Fame shall fill the whole ... and he shall all upon a sudden, give Peace to *Europe*, ... will be a happy time indeed. Then comes the Year ... (that has been much talked of) which, he says, should

produce

produce no great matters; but all Nations are now endeavouring to ſettle and fix themſelves in Peace and Splendor; *Rome* muſt, about this time be deſtroyed, the Converſion of the *Turks* and *Jews* ſoon follows, with a general Peace all over *Chriſtendom*, and no more Treaſon and Rebellion may be expected for a great many Years. And now *England* ſhall rejoyce as well as other Nations, in the many Bleſſings God affords *Annually*. Thus far *John Holwell*'s Predictions upon theſe Times.

And in another Author of no mean Repute, now living amongſt us, I find theſe words, *Anno* 1698. which is the 14th Year after their fourth *Conjunction* in *Leo*, 1683. *Saturn* comes to the oppoſite place of the *Conjunction* in *Quartile* to *Jupiter*, and *Mercury* in *Scorpio*; and in 1699. *Mercury* comes to the *Conjunction* of *Saturn* in *Aquarius*, in direct oppoſition to the degree of the Conjunction, 1682. God preſerve ſome parts of *Europe* from Murders and Slaughters, *&c.* Why may there not ſome Factions ariſe amongſt the *Roman* Clergy, in order to the Ruine of that See? I am of Opinion there will now, and within a few Years ſucceeding, ſays the the famous *J.P.* The ſame Author tells us, the Fates of Kingdoms and Countries do not depend only upon the *Conjunction* and *Aſpects* of the *Planets* only, but alſo upon the Motion of the *Nodes*, for by their Motion (ſaith he) through the Signs, are *Eclipſes* cauſed in divers parts of the Heavens: And when they (eſpecially thoſe of the Sun) happen near the Horoſcopes, of Kingdoms or Cities, they cauſe divers Accidents and Calamities, according to their then Signification, of which he gives a brief Hiſtorical Account of their Effects. *Vide Vox Lunaris, pag.* 15, *&c.*

Hence we may expect to ſee ſome ſtrange turns theſe Years, of which let our own Experience confirm or contradict; for no Man, I think, of the greateſt Knowledge, dares be poſitive in theſe obſtruſe Matters. *Nemo particularia Prædicit.*

The moſt conſiderable Accidents of the laſt Year in *Europe*, was the great Troubles and Conteſts in the Election of a new King of *Poland*; at the ſame time, that they might be ſure of one, they made choice of two; a thing, I preſume, rarely known before; upon which an Inſurrection or Rebellion aroſe in *Hungary*, which, I think, was ſoon quieted again. Then great endeavours uſed to compoſe and ſettle a happy Peace in *Europe*, ſo much deſired on all Hands, not without very hopeful Succeſs, at the writing hereof, in *Auguſt*, 1697. This Year the *French* Forces took the Town of *Aeth*, and made a brisk

Attaque

upon *Barcelona*, which cost them dear, with some other ...s fresh enough in every Man's Memory. And now I have ... the work is very near finished, and our Troubles draw ...rds a happy Period, which will be welcome news to all ...st Hearts.

Campanella, in his *Spanish Monarchy*, speaks there of the ...gdom of *France*; he tells us, 'tis the greatest, richest, and ...st populous Countrey in *Christendom*; for it hath in it twen...seven Thousand Parish Churches, and feeds about one hun...d and fifty Millions of Souls: 'tis fruitful by Nature, and ... rich, through the Care and Industry of the Inhabitants, ...ugh it is Inferior to no other Country whatsoever. Thus it ... in his time; but if he was now living, he must give ano...er Account, both as to its Number of Inhabitants and Gran...eur; which, by relation of those who have been Eye Witnes...es, is at this time very much Depopulated and Ruined, in most ...rts thereof, tho' the King himself is still great, and seems ...contend with the whole World: And if so, certainly no...hing can be more acceptable to that Nation, than a happy and ...eedy Peace, which I pray God may be suddenly effected and ...mpleated in all particulars.

From my House in Baldwin's *Court, in* Baldwin's *Gardens over against the Hole in the Wall.* August *the* 10*th*, 1697.

The Conclusion.

Farewel my little Bark! thy Voyage take,
Weigh Anchor, quit the Shore, and all Sail make:
Should some bold Rover meet thee on the Main,
Pour in Broad Sides, and force him back again.
Thy Cargo's *Truth, dread not base Envy's Rage,*
Bear up, tho' he have got the Weather-Gage:
And let the proud insulting Whipster *know,*
Thou scorn'st to Strike, or Truckle to a Foe.
Nor fear, when he attempts thee to Engage,
But give him Bounce *for* Bounce *in every Page.*
I aim at none, but those that carp at me,
If none such were, these Lines should silent be:
But to my Friends I wish good Health as mine is,
And of a constant Happiness no ——
